

NAME:

SUBJECT: PSYCHOLOGY

PROFESSIONAL PREDICTION:

DIAGNOSIS	This is the knowledge I need to secure for Perception		Tick when you have revised this	PSYCHOLOGY PROFORMA
1	Definitions of sensation & perception. Constancies, the five depth cues & visual illusions.			
2	Using the source material to extract answers.			
3	Understanding six key points of the Core Theory, Constructivist Theory . Specific examples required to explain points put forward. Make up a mnemonic.			
4	Criticisms of the CT with two marks allocated for making the point and then explaining why it is not a valid argument.			
5	Understanding four clear points about the AT, Nativist Theory . Must contrast with the CT.			
6	Know the aim, method and results of the Haber & Levin's CS . Use of key terminology is key here. Research method, sampling method, design method & the groups that they were divided into. Use the aim, method and results structure here.			
7	Criticisms of the CS with two marks allocated for making the point and then explaining why it is not a valid argument.			
8	Applying our knowledge using the key term of context with advertising – Applications - four marks			
THERAPY	This is where and when I will secure the knowledge: Lunchtimes: Thursday in Room U101. After school – Friday in Room U101. Email JCY or SHL with answers to exam questions.			
TESTING	This is where and when I will be tested on my knowledge: Mock exam, end of unit test, starters. Past papers downloaded from OCR or found on Edmodo.
